

JetSpa
Spa Pumps

PUMP

The DAYLIFF JetSpa pump is a high flow, high pressure, quiet running pump for particular application in spas and water features. The high efficiency impeller gives enhanced performance and the pump is of robust and simple construction to give years of reliable operation. Materials of construction is engineering plastic with Noryl impeller.

MOTOR

The pump is close coupled to asynchronous two pole motor with continuous operation rating and overload protection. Single phase pumps can be connected directly to mains electrical supply through 10A fuse or MCB while three phase motors require a remote starter.

Enclosure: IP55

Insulation Class: F

Speed: 2900rpm

OPERATING CONDITIONS

Pumped Liquid: Thin, clean non-chemically aggressive liquid without solid particles or fibers

Max. Liquid Temperature: +60°C

Max. Ambient Temperature: -10°C - +40°C

PUMP DATA

Model	Power (kW)	Current (A)	Voltage (V)	Dimensions (mm)				Weight (kg)
				Outlet/ Inlet	A	B	C	
JetSpa 1.5	1.5	8.7	1x240	50	380	186	277	12
JetSpa 3.0	3	6.4	3x415	75	450	260	319	18
