

AIRMAC AIR BLOWERS

Airmac Air blowers are linear diaphragm compressor pumps that provide aeration solutions particularly to aquaculture, environmental, industrial, medical and consumer applications. They are compact efficient and extremely quiet suitable for installation in sensitive environments which demand low noise operation. Features include;

- Extremely quiet, low vibration operation with low power consumption and low starting current.
- Easy maintenance, long life and robust even under difficult power supply conditions.
- Internal safety switch system to prevent further damage while diaphragm is broken.
- Oil-free

Enclosure Class: IPX0

Power: 1x240V, 50Hz

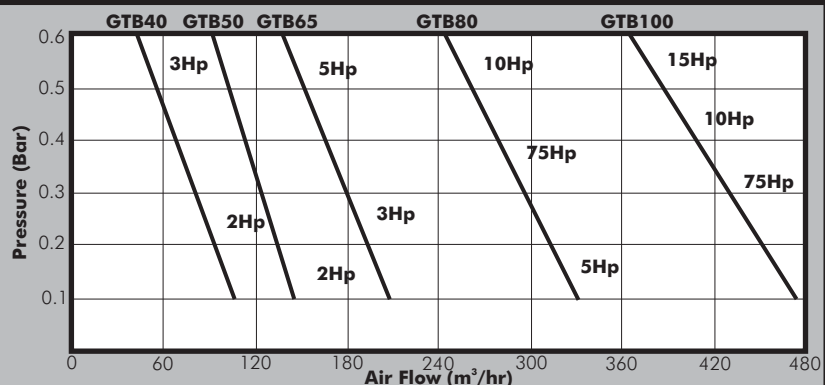

Optimal Operating Range: 0.1 to 0.25bar

EQUIPMENT SPECIFICATIONS

Model	Motor Power Watts	Noise (dBA)	Inlet/Outlet (mm)	Dimensions (mm)			Weight (kg)	
				L	W	H		
DBM-60	61	>47	18	236	181	191	7	
DBMX-80	68			262	216	223	9	
DBMX-100	87	>48		272	226	247	12	
DBMX-200	186							

GTB

The GTB Series are heavy duty Positive Displacement (PD) Aeration blowers in vertical configuration to save space and significantly reduce vibration. GTB blowers are characterised by their extremely robust construction, durability, excellent power efficiency and provide quiet and low vibration operation. Features include;

- Air re-circulated chamber for enhanced cooling.
- High efficiency blower.
- Protection against reverse rotation.
- Two stage inlet silencer, rubber couplers and adjustable anti-vibration base for low noise and vibration operation.
- They are close coupled to a continuously rated IE3 phase enclosed fan cooled motors complying to IEC specifications.

Speed: 1450rpm

Power: 380V/50Hz

Enclosure: IP54

Insulation: E
