

Chemical Dosing Tanks

DAYLIFF chemical tanks are specially designed for use in dosing applications of various concentrate chemicals. They are made from strong corrosion resistant GRP and are available in various sizes according to applications. All are provided with a reinforced top to support a dosage pump mixer, an inspection/filling cover and a graduated chemical volume scale. A variety of dosage pumps are available to suit the dosage requirement.

Also available are hand and electric mixer options to provide chemical concentrate consistency. Electric mixers are of low speed 200rpm type and specification includes a 120W geared motor and PVC shaft with paddle and they are suitable for low and medium viscosity liquids. Two models are available with 150mm and 220mm paddle diameter depending upon the dosage tank size. Hand mixers are made from PVC and include a V-shaped mixing plate and a lever handle.

MIXER SPECIFICATION

Tank Size		60L	100L	170L	400L	600L	1000L
Tank Height	A	670	840	1100	1240	1000	1200
Tank Diameter	B	350	500	500	650	900	1200
Between the two propellers	C	40	210	470	160	120*	120
Propeller Diameter	D	150	150	150	220	220	220
Electric Mixers		MS112M4P06E1500			MS112M4P11E2200		

*Shaft trim required
